Platform v2.0

Expectations

- A Your registered email at time of registration (working for all 3 users)(not fired from a workflow)
- A 1 day prior email reminder. (from the standard pre-event sequence for virtual events) Not tested.
- 3 stage workflow (standard test event workflow) attached automatically
 - 1hr prior an email reminder that workshop starts in an hour and has the caio logo attached. (working for all 3 users)
 - 2hrs prior an email that has survey link (Partial working. Sent the survey, but sent 1 hr before not 2hrs as the workflow was designed.) I am wondering if its only keying on the first timing
 - 1hr prior an email with a list of files (working for all 3 users)
- At completion a thanks for attending email to attendees (not fired from a workflow)

- 1hr after completion of event an email sent to coach via a manual attached workflow called email coach test.
- At completion of event a how did your workshop go email to coach (from Post event coach survey sequence) fired 1 day after at 9:00
- 30 days after event email to coach (from Post event coach survey sequence) Not tested.

Will update as the remaining steps complete.
