

Where things stand & what's next

Prepared for Jeff Verdun · June 19, 2026

Jeff — a quick map of the assessment platform: what just went live, what I'm building next, and the few things I need from you. Item numbers match your feedback list.

JUST SHIPPED — LIVE NOW, READY TO TEST

CEO / Group Report for Leadership Vision Alignment. Combines a leadership team's individual responses into one report — the CEO's answers next to the team's, the financial matrix, the strengths/weaknesses ratings, the obstacles, and everyone's written answers side by side. Open an invited LVA campaign and click **"View group report."**

- ✓ Earlier this month: branded invitation emails, the polished survey experience, campaign setup (delete, send-timing, results & coach-notify toggles, select-all, custom HTML email), and the report cleanups across Rockefeller / QSP / LVA.

BUILDING NEXT

- fix** 🐛 **Campaign-setup error you hit** — the "participants can only be added in DRAFT" message when creating a campaign. I'm fixing it so people are added in one step.
- H** 🕒 **Admin navigation redesign** — grouping the top-bar buttons into dropdowns (assessments together, workshops together, ...), per your note that there are too many buttons.
- H** 🌐 **Custom domain** — pointing **platform.scalingup.com** at the app. You create the DNS record; I'll configure it and send you the exact entry.
- #15** ✉️ **Results-email approval** — making the "send results" email editable & approvable on already-published assessments (today it's only reachable on drafts).
- #6-14** ✨ **Assessment polish** — fewer clicks in the survey (section intro + questions on one page), and a proper default invitation-email body.
- #19** 🖼️ **Custom slides** — insert branded/promo slides into the survey flow (like Esperto's Verne slide).

#23

Longitudinal comparison — see how a respondent's answers change across rounds (quarter vs quarter, year vs year).

#32

Industry benchmarking — answers compared to industry norms (the Esperto "peers" feature). See the question below.

WHERE I NEED YOU

#29

Leadership Vision Alignment wording. I've put together a plain-language comparison of our current questions vs. your source (especially the "Obstacles & Challenges" section). **I'll send it alongside this** — just confirm the changes and I'll update it.

#32

Benchmarking — two decisions. (1) Build it for every assessment, or just specific ones? (2) Where should the industry benchmark data come from — do we have access to Esperto's, or do we define our own norms? I can't show "vs. industry" without a data source.

#33

Report accuracy. Whenever you finish your side-by-side comparison of the reports against the originals, send the specifics and I'll correct them.

Scaling Up Assessment Platform · status & plan · June 19, 2026. Order and timing are flexible — happy to reprioritize on your call.
